

Going Around In Circles

[Litmus A Freeman](#)

Going around in circles (going around)
Spinning natural cycles ('round in circles)

Once there was nothing, then there was something
But something of nothing, 'cause everything comes from nothing at all
We're all going somewhere (somewhere), somewhere or nowhere (nowhere)
We just don't know where, so just enjoy the ride
We think we're on the way to some special destination
But see it's all about 'The Trip', enjoying life in liberation

We're going around in circles (going around), spinning natural cycles (around in circles)
Going around in circles (going around)
So flow in nature's cycles and just dance, dance, dance

First it comes, and then it goes (then it goes), but where we come from no one knows (no one knows)
Without attachment it all flows, 'cause we control nothing at all
From the darkness comes the light (comes the light), and then from daytime back to night (back to night)
But from the darkness true insight, the dark's our shadowed light
After winter comes the spring, and then in summer we begin
The fall of light, through autumn's glow and back to winter, so we know

We're going around in circles (going around), spinning natural cycles (around in circles)
Going around in circles (going around)
So flow in nature's cycles and just dance, dance, dance, dance

We're going around in circles, spinning natural cycles
We're going around in circles, so flow in nature's cycles
And just dance, dance, dance, dance

Going around in circles (going around) (Going around!)
Spinning natural cycles (around in circles) (around and 'round and 'round)
We're going around in circles (going around)
So flow in nature's cycles
And just dance, dance, dance (come on and dance)

Dance, dance, dance (vamos!), dance, dance, dance
Dance, dance, dance, dance, dance (we gotta keep on dancing)

In truth, spiralling 'round, the proof, in nature is found
What goes up, must come down, in cycles, spiralling 'round...
